Summary

Frontend Developer with a B.Tech in Computer Science and 3 years 4 months of full-time experience at Cosmotech AI. Specialized in building scalable, responsive enterprise web applications using React.js, Next.js, and Angular. Proven track record in API integrations, modular UI architecture, and debugging. Collaborated extensively with cross-border engineering teams at the parent company (Cosmotech Philippines, Inc.), including a one-year physical on-site deployment in the Philippines, to deliver high-performance frontend architectures for international enterprise applications. Actively leveraging frontend expertise to deliver robust full-stack architectures built with Node.js, Express.js, and PostgreSQL..

Technical Skills

Frontend Stack: React.js, Next.js, Angular (v18), TypeScript, Redux, TanStack Query, Context API, Tailwind CSS, JavaScript, HTML5/CSS3.
Backend & Tools: Node.js, Express.js, PostgreSQL, SQL, Prisma ORM, Docker, Git, GitHub, Vite, REST APIs, Jest, CI/CD..

Professional Experience

Cosmotech AI **Jun 2023 – Oct 2026**
Frontend Developer (Full-time) *Noida, Uttar Pradesh*

Enterprise HR Portal – Landbank Philippines

- Engineering responsive frontend UI layout components using **Next.js** and **TypeScript** for a private internal employee management system customized for a major overseas public financial institution.
- Translating complex administrative workflows into modular, low-latency views while configuring optimized internal routing paths to manage dense personnel records safely.

QMS (Queuing Management System)

- Collaborated within a 4-member agile engineering pod to code intuitive terminal kiosk interfaces and staff token tracking dashboards using **React.js** and utility-first **Tailwind CSS** properties.
- Implemented role-specific layouts using component-driven protected routing, utilizing **Git** and **Azure DevOps** for version control, collaborative Pull Request validations, and daily sprint tracking.

Cosmotech AI **Jan 2023 – Jun 2023**
Frontend Developer Intern *Noida, Uttar Pradesh*

HRIS (Human Resource Information System)

- Promotion Timeline: Initially joined as a 6-month intern; extended into a 5-month probationary trainee phase based on strong project delivery.
- Developed and maintained core scalable modules covering employee records and performance profiles offsite using **Next.js**, **TypeScript**, and **Tailwind CSS** to automate company lifecycles.
- Configured file-based dynamic routing to ensure smooth page-to-page navigation across personnel screens, integrating backend web endpoints securely via native **Fetch API** protocols.

Projects

HRIS Management System | *Node.js, Express.js, PostgreSQL, Prisma ORM, Docker, Jest, CI/CD* **Ongoing**

- Architected and developed a modular, layered backend using **Node.js** and **Express.js**, separating routing layers, controllers, and database services to maximize codebase maintainability.
- Designed relational database schemas with **Prisma ORM** and **PostgreSQL**, while utilizing **Docker** containerization to isolate environments and streamline local development workflows. .

Education

B.Tech in Computer Science — Sharda University, Greater Noida, UP 2019 – 2023
